

Do you carry a plan for social Change?

kanthari empowers social visionaries to become actual social change makers.

kanthari is an international institute that recognizes leadership in **those** individuals who come from the **margins of society** and have **overcome** major adversities in their lives. Therefore at kanthari, we **focus** on participants who have a passion to create a better tomorrow and have the strength to be forces of good rather than victims of circumstance. During a unique 7 months training course with a tailor made Curriculum, participants experience hands-on what it takes to turn an idea for social change into reality. They will be equipped with all skills required to set up impactful projects and initiatives. Over the past 5 years 98 participants from 35 countries graduated which resulted in over 60 active social projects.

A kanthari is a plant that grows wild in every backyard of Kerala, a small but very spicy chili with a number of medicinal values. A kanthari is also a symbol for those who have the guts to challenge harmful traditions and the status quo, who have fire in their belly and a lot of innovative ideas to make a positive difference. For us a kanthari will become the symbol of a new type of leader – a leader from the margins of society.

The medium of learning is English, so a working knowledge of the language is essential. Basic computer skills are also required. Are you 22 years or older and do you want to make a difference, then read the FAQ on our website and apply via the online application form.
